I'm not sure how useful this is.

I had one in autocad, thought i'd see if it worked in revit

1) Identify the smallest pattern

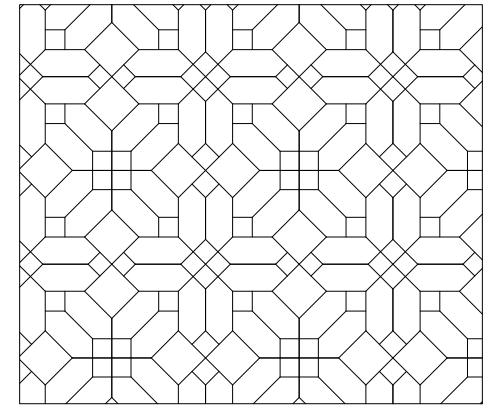

2) create a group with that pattern

3) lay the pattern out as necessary to verify

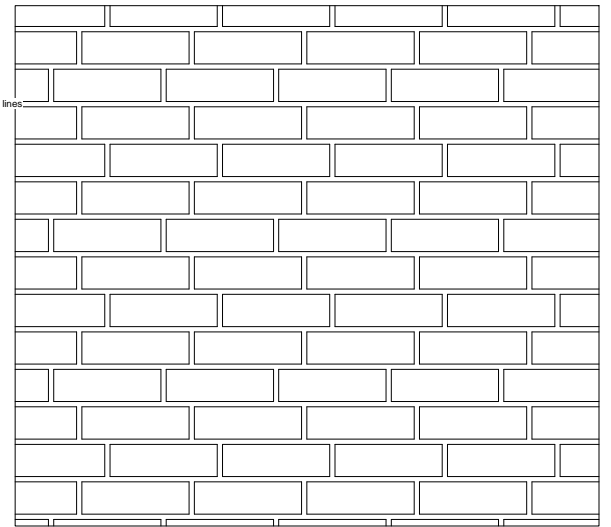

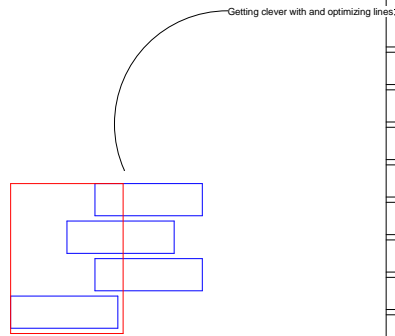

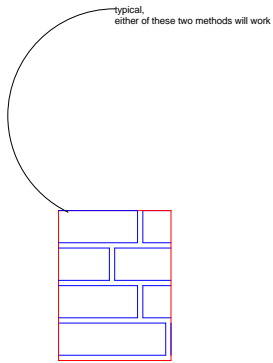

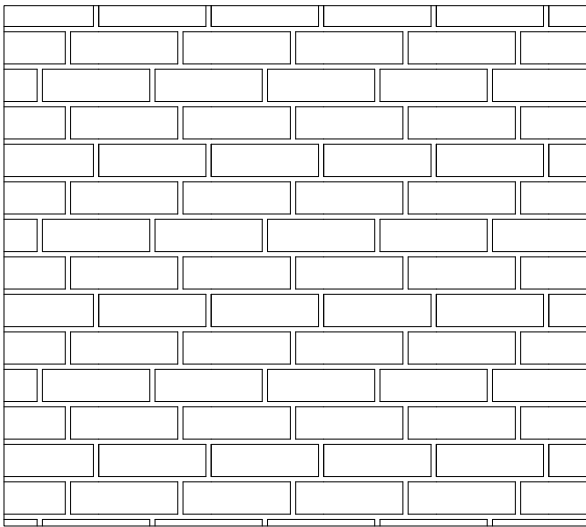

4) copy the bigger pattern and ungroup. Use this to make a hatch pattern from.

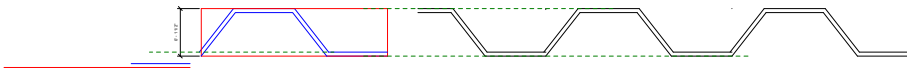

5) try it out

I think i have some duplicate lines  
...but you get the idea
